## Python Full Stack Developer

+91 7007319657 | alkamahsheikh900@gmail.com | GitHub | LinkedIn

### PROFILE SUMMARY

BCA graduate specialising in Information Technology, with hands-on training in Python Full Stack Development and a year of freelance experience. Skilled in building end-to-end web applications using Django, Flask, React, and Node.js, with exposure to cloud deployment on AWS. Passionate about delivering robust, scalable solutions and keen to grow in a collaborative engineering environment.

### SKILLS

|                        |                                                                         |
|------------------------|-------------------------------------------------------------------------|
| <b>OS:</b>             | Windows, Kali Linux                                                     |
| <b>Frontend:</b>       | React.js, Next.js, HTML5, CSS3, JavaScript, Tailwind CSS, Material-UI   |
| <b>Backend:</b>        | Python, Node.js, Flask Framework, Django Framework                      |
| <b>Database:</b>       | MySQL, PostgreSQL, MariaDB, Oracle SQL                                  |
| <b>Cloud (Basics):</b> | AWS, Docker, Jenkins, Kubernetes, Terraform, Shell Scripting, DevSecOps |
| <b>Tools:</b>          | Git, Render, Netlify, REST APIs, Vercel, HopsCotch, Postman             |

### EXPERIENCE

#### Python Full Stack Developer – Qspiders / Pyspiders [Training]

Mar 2026 – May 2026

- Underwent intensive full-stack training covering Python, Django, Flask, React.js, Node.js, RESTful API design, and relational database management.
- Built and deployed multiple web applications applying MVC patterns, ORM-based database interactions, and JWT-based authentication.
- Gained exposure to cloud infrastructure basics including AWS EC2, RDS, Docker containerisation, and CI/CD concepts.

#### Freelance Web Developer

~1 year

- Delivered end-to-end web solutions for clients, handling requirement gathering, UI design, backend integration, and deployment on Vercel / Render.
- Worked across the stack using Django, PHP, React, and MySQL, ensuring responsive design and clean REST API contracts.

### PROJECTS

#### Meditripcare [\[LINK\]](#) (Online Treatment Booking Center)

Feb 2026

**Skills:** Django, Python, DRF, PostgreSQL, Axios API, AWS EC2, Aurora RDS, HTML5, CSS3, JS

- Designed and developed a full-stack medical appointment booking platform allowing patients to search doctors, select specialities, and book time slots.
- Implemented secure REST APIs with Django REST Framework and CORS headers; connected a PostgreSQL database hosted on AWS Aurora RDS.
- Deployed the backend on AWS EC2, achieving reliable uptime and seamless Axios-driven frontend-backend communication.

#### Ecommerce Store [\[LINK\]](#) (Full-Stack E-commerce Website)

Mar 2026

**Skills:** React, React Router, Axios, Hooks, Node.js, PHP, XAMPP, MariaDB, ES6, Hashing, JWT

- Built a feature-complete e-commerce site with product catalogue, cart management, order placement, and user authentication using hashing and session management.
- Implemented debounced search, local storage persistence, and React Hooks for a smooth shopping experience with minimal re-renders.

- Connected a PHP/Node.js backend to a MariaDB database via XAMPP, handling form validation, routing, and secure password hashing.

#### **MSITM Web** [\[LINK\]](#) (College Management Website)

*Oct 2025*

**Skills:** Django, Python, DRF, CORS, WhiteNoise, HTML5, CSS3, JavaScript, Axios, PostgreSQL

- Developed a college management portal for MSITM Gonda covering student records, notices, and administrative functions.
- Integrated Django REST Framework APIs consumed by a JavaScript/Axios frontend, with WhiteNoise middleware handling static file serving.
- Configured CORS headers and PostgreSQL for secure cross-origin requests and reliable data persistence.

#### **FoodDash** [\[LINK\]](#) (Food Delivery Web Application)

*Dec 2025*

**Skills:** PHP, PHP Sessions, LocalStorage, XAMPP (Apache, MySQL), MariaDB, REST API, PHP Routing

- Created a food ordering and delivery web app with restaurant listings, menu browsing, cart management, and order tracking.
- Implemented server-side routing, PHP form validation, and session-based authentication with local storage for cart persistence.
- Managed the full data layer on XAMPP with MariaDB, writing optimised SQL queries for menu items, orders, and user data.

## **EDUCATION**
